Faville Web Application on Facilitation Tools & Techniques

Faville Web Application on Facilitation Tools & Techniques is a web application for everybody who wants to effectively and creatively facilitate courses, meetings, or workshops delivered in the virtual environment.

This Web Application can serve as a very good resource and support tool for virtual facilitators.

It is a collection of tools, techniques and methods curated from the various sources, adjusted in such a way that they can be used in the virtual environment.

Each item has its card.

The unified structure of the cards allows you to choose the most suitable one for your particular situation by combining the following 6 filters:

▶ Group size in persons

▶ Time frame

▶ Phase

▶ Purpose

▶ Skills
